

# Walk In Wheels

For people who have prior experience using pottery wheels we are now offering open wheel time. We are starting this offering on a trial; pricing, availability, and details may change.

## Availability

During available hours our pottery wheels can be used as long as there are no classes, parties, or other events using the wheels. Most classes will be posted online, but you can always call to double check that wheels will be available. This open wheel time will be ONLY for individuals with prior experience, we will not be able to offer instruction or any help to those using the wheels.

If you want to try the wheels, but don't feel confident in your ability you can sign up for a wheel throwing workshop or a private class.

## Pricing

Clay will be sold by weight in 1.5lb increments. When you are finished with a piece it will be weighed and there will be a fee for firing/glazing (optional).

### Low Fire Clay (Cone 06)

- Clay \$4/pound
- Finished Piece - Fire ONLY \$4/pound
- Finished Piece - Fire, Glaze, Fire \$8/pound

### High Fire Clay (Cone 6)

- Clay \$6/pound
- Finished Piece - Fire ONLY \$6/pound
- Finished Piece - Fire, Glaze, Fire \$10/pound

Example: Starting with a 1.5lb piece of low fire clay (cost \$6). Creating something similar in size to a cereal bowl. When finished it was measured and weighed 1.25lb, to fire this piece, glaze, and fire again, it would be an additional \$10. Total project cost would be \$16 + tax.

### Cleaning & Trimming

Clean up will be your responsibility. You will have to be finished with your project, and done with clean up by the stated available wheel times. There will be a \$25 cleaning fee if the wheels and tools are not cleaned up properly.

Projects must be removed from the bat and properly labeled. You will pay for your project costs before leaving and fill out a project form. If you are interested in trimming your bowl you must return within 3 days from when you created your project. We will not offer trimming.

### Firing & Glazing

Firing for clay projects will be completed about every 2-3 weeks. We will notify you that your project is fired and ready to be picked up/glazed. Once glazed low fire projects are fired in about 1 week, high fire is a slower turn around (about 3 weeks).

We will only hold projects for 60 days, after this time projects will be discarded.
